KANSAS CITY WHINES,

A Few Reflections for the Benefit of the Many.

The Kansas City Times would have its readers believe that the railroads, having gone over the result of the late order of the commissioners, find that it reduces the entire traffic of the state ten per cent, and that therefore all through rates will have to be put up. In other words Wichita's traffic amounts to ten per cent of the entire tonage of the state of Kansas. If that be true all the more sound becomes the reason for the reduction. The Times whines about "Kansas superintendent of the United States mint | trade centers" and sneeringly observes that Kansas is trying to lift herself over the fence by her boot straps. Having lifted Kansas City over the same barrier by the slack of her breeches a much less dainty and sure hold, we shouldn't be surprised if the state proved successful with her boot-strap scheme. Wichita may be a mere artificial commercial metropolis, as the Times suggests. but she is, nevertheless, in no artificial manner worrying Kansas City. As for the Times' threat of raising the through rates, that is all right. Such a proceeding will hit Kansas City just as hard as it can hit Wichita.

But why will not the Times listen to a little common sense, based on the logic of the situation. It has been a very few years since Kansas City was no greater nor more important than is Wichita today. Wichita is a full day's run to the a law if enforced in this country would westward of Kansas City and Wichita rob the average newspaper of its stock will not hurt Kansas City any more than Kansas City hurt St. Louis, and only and exactly in the same way. California, or rather some smart Californians, adopted the idea that was suggested several months ago in this state, of collecting choice specimens of the state's products and classifying and arranging them in panoramic order upon a train of specially constructed cars so as to be transported and exhibited at any and every point in the country reached by a railway. The primary ob ject of the undertaking was to advertise the state by making exhibits of the state's resources, consequently they gave it the name of "California on Wheels" to attract sightseers. The secondary object was a little private business enterprise, and in this it is no less a success. The show-for such it is-has crossed the continent and is now 'doing' the Kansas has soil, Missouri rocks, and rills, hills, hollers, brooks, briars, and ore, ore; yet Kansas has the soil and the Atlantic seaboard. It is almost certain that the Sullivan-Kilrain mill arranged for next month and for which both combatants are making preparation, if permitted to take place, will be the most brutal in the history of prize-ring savagery. The exact locality where the mill is to take place, is not stated though ; it is understood to be at a point in Louisiana accessible to New Orleans. It were a pity and scandal on that state if the civil authorities fail to exert themselves to prevent the battle, but it is hardly expected that such effort will be made in earnest. A state that legalizes wholesale robbery, as in the case of its notorious lottery scheme, can hardly be expected to interpose serious objection to the no less immoral, though more brutal sport (?) of prize fighting. If the fight must be made there is no more appropriate place for it, perhaps, than the vicinity of the Crescent City, unless it be near the Hub, where one of the bruisers is esteemed a demi-god.

The bureau of the census department for its work in 1890, has divided Kansas in four districts, which may be known as southeast, northeast, northwest and southwest, numbered, respectively, first, second, third and fourth. The first district embraces the seventeen counties of Linn, Bourbon, Crawford, Cherokee, Labette Neosho, Allen, Anderson, Coffey, Woodson, Wilson, Montgomery, Chautauqua, Elk Greenwood, Lyon and Chase. The second district contains the eighteen counties of Miami, Johnson, Wyandotte, Leavenworth, Atchison, Doniphan, Brown, Jackson, Jefferson, Douglas, Franklin, Osage, Shawnee, composed of the counties south of a line running from the north line of Greeley county on the west to Chase county on east and the western line of Chautaugua commended by the millers of Kansas county on the south.
